HEZE

Testing Center

We are pleased to announce that in order to further enhance our research capabilities and technology level, the laboratory will be fully upgraded. This upgrade is not only an improvement to existing equipment and facilities, but also another important step in our commitment to technological innovation and research excellence.

Upgrade Details

1. **Equipment Updates:** We will introduce the latest research instruments and equipment to improve experimental precision and efficiency. This includes optical color meter, weather resistance tester, tensile strength tester, etc.

2. **Space Renovation:** The laboratory layout will be optimized, adding dedicated experimental areas and rest zones to create a more comfortable and efficient working environment.

In order to ensure the quality of the product, testing whether the product color is qualified is also one of the important steps, so our R & D manager in the paint line workshop and QC staff jointly test to ensure that each product meets the high standard of color quality requirements.

Paulownia/Bamboo/Basswood /PVC Mixed Color Box

We are pleased to inform you that after careful design and development, our 4-in-1 color cards have been fully upgraded! This upgrade not only expands the color selection, but also optimizes the sachet layout and material quality for a richer and higher-quality experience.

1. **Rich color choices:** A variety of popular colors and classic tones have been added, covering warm colors, cool colors, neutral colors and other options to meet the needs of different design styles and application scenarios.

2. **Optimized color card layout:** redesigned the layout of the color card, so that the color contrast is more intuitive, find and choose the color more convenient and fast.

Metal Scratch Resistant

"Resist the invasion of metal, guard the beauty of the equipment. Our anti-metal scratch technology adds a solid layer of protective shield to your products, so that your equipment always retains its original beauty and integrity."

MTM Blinds Updated

To make your choice even more personal, we are about to launch the MTM blinds sample box. Updated with more colors to choose from, and more details can be contacted directly.

Come To Visit

Customer visit

On the eve of the Shanghai R+T exhibition, many customers preferred to visit our Huasheng Industry factory to understand our production process, advanced equipment and strict quality control system.

Customer welcome board

Shanghai R+T

Huasheng Industry welcomed many old friends at the exhibition. These long-term customers have said that Huasheng's products and services are consistent, which makes them feel trusted.

At the same time, we also got to know many new friends, through the exchange and interaction during the exhibition, many new customers showed great interest in Huasheng Industrial products, and reached a preliminary cooperation intention.

The successful conclusion of the R+T exhibition is not only a high recognition of Huasheng Industry brand and products, but also an important step towards the international market.

Here, Huasheng Industry sincerely thanks all the customers and partners who came to the exhibition, thank you for your support and trust.

Let's look forward to meeting again at R+T Shanghai 2025 to explore the possibilities of the future! Whether it's innovative technology, cutting-edge design or amazing products, we will experience and explore together. Let us lead the development of the industry together, explore the road to innovation, and create the future together!

Pleated Shade

Recently, the order volume of Huasheng's pleated shade product workshop continues to rise, and the production line is busy. This model is easy to install and excellent shading effect, which has been widely favored and praised by customer..

We also ensure that each batch of products is strictly inspected to ensure product quality and provide you with high-quality shade products

Work Safety Inspection

Regular fire drills have become part of the company's regular management. Each drill is not only the consolidation and improvement of staff fire knowledge, but also a comprehensive inspection and optimization of our emergency response mechanism.

R&D Meeting

Through weekly R&D meetings, we keep an eye on the latest market demands and technology frontiers to promote product innovation and quality improvement. Bernice Ann, our Research and Development Manager, leads the team to ensure that every project is refined and innovative products are constantly introduced to better meet the needs of customers.

At R&D meetings, our team members actively communicate and share their latest research results and technological breakthroughs. The weekly R&D meetings are not only a platform for communication within the team, but also provide important support for the company's overall strategy. Through continuous innovation and improvement, we are able to always be at the forefront of the industry and provide our customers with the best quality products and services.

Aluminium Shutter Updated

The R&D team is constantly innovating and recently successfully optimized the design of the plastic end cover of the aluminum Shutter. This improvement not only improves the durability and aesthetics of the end cap, but also enhances the overall quality and performance of the product.

We use more advanced materials and manufacturing processes to greatly improve the durability of plastic end caps. The optimized end cover can perform well in a variety of environments and maintain stable performance over a long period of use. The new design is not only more modern and beautiful, but also takes into account the user experience, making the end cap easier to install and maintain.
