

GALLERY PHOTO

After a year of preparation, we are excited to announce: After a year of hard work, our new exhibition hall is finally born at this moment!

The new showroom is more than just a space, it is our contribution to the industry and a demonstration of our confidence in the future. It will be a palace of innovation, a witness to fashion and a showcase for products. We are committed to providing you with the most cutting-edge products, the most unique experience, and the most intimate service.

We invite you to step into this new exhibition hall and feel the atmosphere of innovation with us and bask in the wonderful product display.

EXHIBITION HALL DISPLAY

Welcome to our showroom, a space that blends innovation, beauty and quality to present you with a wonderful product journey. Here, you will be immersed in the wonders of technology, the art of design and the luxury of quality, our relentless pursuit of excellence.

Walk into our showroom to experience the beauty of Arctic products and explore endless possibilities for innovation.

ACTIVE REGION

Below you will see our showroom activity area, a vibrant and interactive space designed to provide you with a more exciting and enriching experience.

## R&D

RESEARCH AND DEVELOPMENT

Product development has always been a key stage in huasheng's pursuit of excellence. It is the intersection of technology and innovation, creating market leaders. In the pursuit of excellence, we always adhere to the concept of innovation and constantly challenge ourselves.

We firmly believe that the unremitting efforts of product research and development are not only to meet market demand, but also to lead the future and make life better, smarter and more convenient. This is our dedication to innovation, the pursuit of quality, and the infinite vision for the future.

### NEW DEVELOPMENT TRENDS

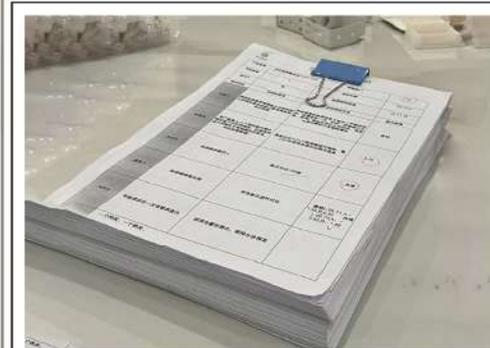

## LABORATORY

TEST

TEST

TEST RESULT

In our lab, every day is a new challenge, a new discovery. We are committed to contributing to future technological development and product innovation through rigorous testing and in-depth research. Thank you for witnessing the continuous progress of science and technology with our peers.
